Smartbryte

Online Multilingual School for Kids

Lovable Homepage Build Prompt — Detailed Brief with Exact Content

This document is the complete brief to be handed to Loveable for building the Smartbryte homepage. It contains the exact copy (verbatim) to use — do not invent or paraphrase content — plus the design inspiration materials and the design tokens extracted from the two attached MD style-reference files. Scope: the homepage only. No additional pages, no user accounts, no payments, no other functionality.

How to use this PDF: send it to Loveable together with the attached files

- Attached MD file #1: DESIGN.md — Quizlet style reference (tokens, components, layout, do's/don'ts).
- Attached MD file #2: DESIGN (1).md — Duolingo style reference (tokens, components, layout, do's/don'ts).
- Attached image #1: Education Landing Page (Behance) — content source + visual reference.
- Attached image #2: WonderKids Landing Page Exploration by Paperpillar (Dribbble) — visual inspiration.

Core instruction for Loveable

Look through the attached images and the two design MD files. Find the relationship between the visual language and the architecture of each design. Then create a UNIQUE homepage for Smartbryte by borrowing different ideas from each inspiration — blending them into one cohesive, original visual system rather than copying any single source. Use exactly the content provided in Section 4 of this document; do not invent or change copy.

1. Product Overview

Name: Smartbryte

Product: An online multilingual school for kids.

Platform: Loveable.

Deliverable: The homepage (landing page) only.

Scope note: Build only the homepage. Do not add separate pages, authentication, payments, course enrolment flows, or any functionality beyond a static marketing homepage. This is a single-page landing site.

2. Attached Materials (send these alongside this PDF)

Design MD files

- DESIGN.md — Quizlet style reference. Defines a near-monochrome cool system: chalk-canvas #f6f7fb page, paper-white cards, single violet accent #4255ff, Hurme/Inter geometric sans, 8px cards / 24px feature cards / 200px pills, soft rgba shadows, 1200px max-width, 80px section gap, two-level surface hierarchy.

- DESIGN (1).md — Duolingo style reference. Defines a playful paper-white system: white page canvas, single saturated green #58cc02 accent, rounded display type (Feather/Nunito Black), 12px radius, thick 2px sticker-like borders, text-left/illustration-right sections, green footer band.

Design inspiration images

- Education Landing Page __ Behance.jpg — the content source. Contains the exact copy (headlines, stats, testimonials, nav, footer) to use on the homepage, plus a visual reference for an education landing page (cream background, bold headlines, starburst badges, large decorative lettering, stats blocks, parent testimonials, classroom imagery of real children).
- WonderKids Landing Page Exploration by Paperpillar on Dribbble (1).jpg — visual inspiration. Playful purple/yellow/green palette, rounded bubbles, handwritten “play” script, feature cards with icons, team-member circles, blog section.

3. Design Synthesis — Find the Relationship, Create Something

Loveable should examine all four attached items (2 MD files + 2 images) and identify the visual relationship between them. The goal is a UNIQUE homepage that borrows different ideas from each inspiration:

- From Quizlet (DESIGN.md): the disciplined token system, surface hierarchy (white cards on a cool-gray canvas), soft subtle shadows, geometric sans-serif typography, and the 8px / 24px radius pairing.
- From Duolingo (DESIGN (1).md): playful warmth, rounded/chunky components, a single saturated accent used for energy, sticker-like flat fills with clean borders, and the editorial text-left / illustration-right section rhythm.
- From the Behance education image: education-specific content architecture — big bold multilingual headline, starburst “future-ready” badge, stat blocks (22 schools / 2800 children / 24 years), large decorative “abc” lettering, parent testimonials, and real-kids classroom imagery.
- From the WonderKids Dribbble image: kid-friendly energy — rounded bubble shapes, handwritten accent script, feature cards with icons (“Fun Quiz”, “Creative Activities”, “Learn with Games”), and a vibrant purple/yellow/green accent mood.

What “unique” means here

Do not replicate any one inspiration. Synthesise them into a fresh visual language for Smartbryte: e.g. a refined token-and-surface system (Quizlet) + rounded kid-friendly components (Duolingo/WonderKids) + education content blocks (Behance), unified under one original accent palette and one type system. The result should feel like a single, coherent brand — Smartbryte — not a collage.

4. Exact Content to Use (Verbatim — Do Not Invent or Change)

All copy below must be used exactly as written. Do not paraphrase, do not invent additional sections or wording. Where the brand name appears, use “Smartbryte.”

Navigation (top bar)

Home • Why Us • Programs • Testimonials • Apply • Contact

Logo: Smartbryte

Hero section

Headline: Empowering Multilingual Future

Subhead: Master three languages, unlock global opportunities, and prepare for a successful, interconnected future ahead.

Primary CTA: Enroll Now

Badge: Future Ready

Section — Trilingual school

Headline: Fluent Minds. Bright Global Futures.

Subhead: Trilingual Vision School empowers students with English, Spanish, and Mandarin fluency for global success.

Label: Trilingual school

CTA: Get Started

Section — Discover Our Education Network Today

Headline: Discover Our Education Network Today

Subhead: Our innovative network offers immersive multilingual education tailored to help children grow, thrive, and succeed globally.

CTA: Explore Programs

Stats (use exactly):

- 22 — Daycares and Primary Schools
- 2800 — Children enrolled for 2024-2025
- 24 — Years Of Innovation in Education

Decorative element: large “abc” lettering (white / green / blue) behind this section.

Section — Parent Testimonial

Section heading: Parent Testimonial

Testimonial 1 — Emma L. (Parent):

“Our child has flourished in this bilingual environment. The transition to a new language was smooth, and she’s gained confidence in both languages.”

Testimonial 2 — Jane D. (Parent):

“My child loves the multicultural environment. Not only is she learning new languages, but she’s also playing in a trilingual perspective on the world.”

Inspirational voice reference (from WonderKids image — mood only, not required c

“The best place to learn and play for kids”

“The learning materials provided are enjoyable for children.”

“We aim to help children discover the joy of creative learning and grow into well-rounded individuals.”

Feature card names: Fun Quiz • Creative Activities • Learn with Games

5. Design Tokens (Reference from the Attached MD Files)

Use these tokens as the technical foundation. Loveable may adapt them into the unique visual language described in Section 3, but should keep the discipline of a limited palette and a single type system.

Colors (Quizlet — DESIGN.md)

Page canvas	#f6f7fb	Full page background
Card surface	#ffffff	Cards, nav, raised panels
Tinted highlight	#edefff	Promotional/tinted sections
Accent (violet)	#4255ff	Links, filled buttons, active states

Primary text	#282e3e	Headings and body copy
Muted text	#586380	Secondary copy, metadata
Border	#d9dde8	Hairlines, card edges, input borders

Colors (Duolingo — DESIGN (1).md)

Page canvas	#ffffff	Paper-white page background
Primary accent	#58cc02	Eager green — headings, CTA fills, footer band
Secondary accent	#1cb0f6	Spark blue — interactive links, secondary CTAs
Primary text	#4b4b4b	Charcoal — hero/heading dark text
Body text	#777777	Pencil gray — body paragraphs
Border	#afafaf	Outlined button / pill borders

Typography

- Quizlet family: Hurme Geometric Sans (substitute: Inter, DM Sans, Nunito Sans). Weights 400 / 600 / 700. Sizes 12–44px.
- Duolingo family: Feather/Nunito Black for display (48–64px); Duolingo Sans (substitute: DIN Next, Inter, Nunito Sans) for body at 17px/500.

Shapes & spacing

- Quizlet: 8px cards, 24px feature cards, 200px pills, 4px inputs/buttons, 8px base unit, 80px section gap, 1200px max-width.
- Duolingo: 12px radius on buttons/links/nav, 4px base unit, 80–120px section gap, 1200px max-width.

6. Build Checklist

- Single-page homepage only — no extra pages or functionality.

- Use exact copy from Section 4 (verbatim; brand = Smartbryte).
- Synthesise a unique visual language from the 2 MD files + 2 images (Section 3).
- Apply the design tokens in Section 5 as the technical foundation.
- Responsive layout, max-width 1200px, clear section gaps (80px).
- Include: nav, hero, trilingual-school section, network/stats section, parent-testimonial section, footer.
- No accounts, no payments, no enrolment flow — marketing homepage only.

Done

When complete, Loveable should have produced one cohesive, unique Smartbryte homepage that feels like an online multilingual school for kids, built entirely from the user's own content and a blended visual language drawn from the attached inspirations.
